

"Rest" Deluxe Automatic Blood Pressure Monitor

Model: AD761f

HEMODYNAMIC STABILITY DETERMINATION (HSD) (Rest Condition)

Eliminates all possible blood pressure measurement error caused by mental and physical stress and avoids unnecessary multiple measurement to attain an average of your blood pressure. The lack of rest condition, which is detected by the HSD technique, is the most common error in the blood pressure diagnosis. The blood pressure results have to be obtained in sufficient rest condition in order to have an accurate medical judgement of a patient's blood pressure status.

Real **f**uzzy Technology

Real Fuzzy Technology determines ideal cuff pressure based on one's systolic blood pressure and arm size. Users no longer need to pre-set the inflation level before measurement. The technology eliminates arm discomfort through unnecessary high inflation settings and also prevents inaccurate readings caused by erroneous cuff inflation levels.

- Rest Condition Detection
- Real Fuzzy Technology
- Hypertension Risk Indication
- Irregular Heartbeat Detection (IHB)
- 120 memories for 2-users with date and time indication
- Average of last 3 readings
- Jumbo size "XL" digit
- Latex-free patented cone cuff
- Carrying bag
- Lifetime calibration
- PC Link (Optional)
- Adaptor socket

Clinically Validated

This blood pressure monitor has passed the criteria of the European Society of Hypertension by achieving all requirements and achieved the highest possible grade (A/A) according to the criteria of the British Hypertension Society. This monitor further complies with the standard required by the Association for the Advancement of Medical Instrumentation (AAMI).

Cone cuff fits arm circumference: 24~36cm (9.4"~14.2")
Other size cuffs available upon request

Model	Qty per carton	Carton volume
AD761f	8 pcs	0.057 cbm/ctn
